

$\textbf{Temposonics}^{\circledR}$

Magnetostrictive Linear Position Sensors

DATA SHEETGBS Analog

- High pressure resistant sensor rod
- High operating temperature up to 100 °C
- Flat & compact ideal for the valve market

MEASURING TECHNOLOGY

For position measurement, the absolute, linear Temposonics® position sensors make use of the properties offered by the specially designed magnetostrictive waveguide. Inside the sensor a torsional strain pulse is induced in the waveguide by momentary interaction of two magnetic fields. The interaction between these two magnetic fields produces a strain pulse, which is detected by the electronics at the head of the sensor. One field is produced by a moving position magnet, which travels along the sensor rod with the waveguide inside. The other field is generated by a current pulse applied to the waveguide. The position of the moving magnet is determined precisely by measuring the time elapsed between the application of the current pulse and the arrival of the strain pulse at the sensor head. The result is a reliable position measurement with high accuracy and repeatability.

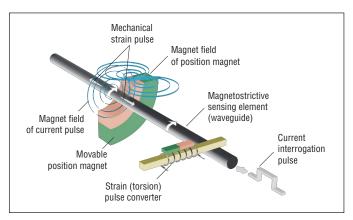

Fig. 1: Measuring principle

GBS SENSOR

Robust, non-contact and wear free, the Temposonics® linear position transducers provide best durability and accurate position measurement solutions in harsh industrial environments. The position measurement accuracy is tightly controlled by the quality of the waveguide which is manufactured by MTS. The position magnet is mounted on the moving machine part and travels non-contact over the sensor rod with the built-in waveguide.

Temposonics® GBS is a rod-style sensor with backwards compatibility for installation into hydraulic cylinders, e.g. in power engineering. With its flat and compact sensor housing and the collateral signal connection the sensor is ideal for small spaces. Due to the pressure-resistant sensor rod and its high operating temperature the Temposonics® GBS sensor is perfectly suitable for use in fluid technology. For improved signal quality the sensor automatically adapts to the strength of the magnet used in the application.

The set points, zero and span position of the measurement, can be modified after installation of the Temposonics® GBS sensor. Programming can be carried out using the standard connection cable. Optionally the sensor offers <code>Bluetooth®1</code> connectivity for programming. In case of <code>Bluetooth®</code> connectivity the set points can be modified even when the sensor is no longer accessible.

TECHNICAL DATA

Input	
Measured value	position
Stroke length	253250 mm
Output	
Voltage	010 VDC and 100 VDC (min. load controller: > 5 kOhms)
Current	4(0)20 mA or 204(0) mA (min./max. load: 0/500 Ohms)
Programming	programming of set points using optional accessories ²
Accuracy	
Resolution	16 bit (minimum 1 μm)
Linearity	< ±0.02 % F.S. (minimum ±60 μm)
Repeatability	≤ ±0.005 % F.S. (minimum ±20 µm)
Sample rate	up to 1200 mm: 0.5 ms up to 2400 mm: 1 ms > 2400 mm: 2 ms
Operating conditions	
Magnet movement velocity	any
Operating temperature	–40+90 °C, Option –40+100 °C
Operating pressure	350 bar, 700 bar peak (at 10×1 min)
Ingress protection	IP67 with proper mating connector IP68 for cable outlet
Shock test	100 g (single shock) / IEC-Standard 60068-2-27
Vibration test	15 g / 102000 Hz, IEC-Standard 60068-2-6 (resonance frequencies excluded)
EMC test	electromagnetic emission according to EN 61000-6-4 electromagnetic immunity according to EN 61000-6-2 The sensor meets the requirements of the EC directives and is marked with C €
Design/Material	
Sensor electronics housing	stainless steel 1.4305 / AISI 303 ³
Sensor rod with flange	stainless steel 1.4306; 1.4307 / AISI 304 L
Position magnet	ring magnet, PA ferrite
Installation	
Mounting position	any
Mounting	fitting flange Ø 18 f7, 6 bores for machine screws (ISO 4762)
Electrical connection	
Connection type	cable gland M12 a-code (5 pin) M16 (6 pin)
Operating voltage	+24 VDC (+20 % / –15 %)
Current consumption	100 mA typically dependent on stroke length
Ripple	≤ 0.28 Vpp
Dielectric strength	500 VDC (DC ground to machine ground)

ACCESSORIES

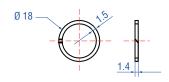

Position magnets 4

Optional installation hardware 4

Ring magnet OD33 Part no. 201 542-2

Material: PA ferrite GF20 Weight: ca. 14 g

Operating temperature: -40...+100 °C Surface pressure: max. 40 N/mm² Fastening torque for M4 screws:

max. 1 Nm

Ring magnet OD25,4 Part no. 400 533

Material: PA ferrite Weight: ca. 10 g

Operating temperature: -40...+100 °C Surface pressure: max. 40 N/mm²

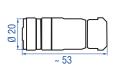

0-ring Part no. 560 853

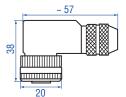

Material: Fluoroelastomer 75 ± 5 durometer

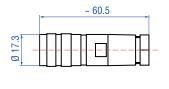

Back-up ring Part no. 561 115

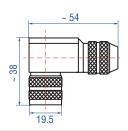

Material: PTFE + 60 % bronze

Cable connectors 4,5

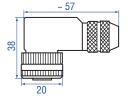

Female, straight, 5 pin M12 Part no. 370 677

Housing: GD-Zn, Ni / IP67 Termination: screw; max. 0.75 mm² Contact insert: CuZn Cable Ø: 4...8 mm

Female, angled, 5 pin M12 Part no. 370 678

Housing: GD-Zn, Ni / IP67 Termination: screw; max. 0.75 mm² Contact insert: CuZn Cable Ø: 5...8 mm

Female, straight, 6 pin M16 Part no. 370 423

Housing: zinc nickel plated Termination: solder Contact insert: silver plated Cable clamp: PG9 Cable Ø: 6...8 mm

Female, angled, 6 pin M16 Part no. 370 460

Housing: zinc nickel plated Termination: solder Contact insert: silver plated Cable Ø: 6...8 mm

Cable

Cable

Dimensions: $3 \times 2 \times 0.25 \text{ mm}^2$

Part no. 530 052

Cable Ø: 6.4 mm Material: PUR jacket; orange Operating temperature: -30...+80 °C Twisted pair shielded

Cable

Part no. 530 112

Cable Ø: 7.6 mm Material: Teflon® jacket; black Operating temperature: -100...+180 °C Twisted pair shielded

Dimensions: 4 × 2 × 0.25 mm²

Cable

Part no. 530 113

Dimensions: 3 × 2 × 0.25 mm² Cable Ø: 7.2 mm Material: silicone coating Operating temperature: -50...180 °C Twisted pair shielded

Programming tools

Analog hand programmer Part no. 253 124

Analog cabinet programmer Part no. 253 408

Programming kit Part no. 254 555
